

# Manitowoc 14000

## Product Guide

ASME B30.5

Metric / Imperial

### Features

- 200 t (220 USt) capacity
- 865 m-ton (6,267 ft-kips) maximum load moment
- 89 m (292 ft) heavy-lift boom
- 98,4 m (323 ft) fixed jib on heavy-lift boom
- 113,8 m (373 ft) luffing jib on heavy-lift boom
- 253 kW (340 HP) engine

# Features

## EPIC®

Manitowoc's field-proven Electronically Processed Independent Controls (EPIC) system delivers high productivity and precise load control by instantly matching a crane's commands to the crane function. EPIC's microprocessor maximizes a Manitowoc crane's function capability and simplifies servicing by pinpointing any problem in the crane's engine, power transmission and other operating systems. In addition, EPIC increases versatility by easily tailoring a Manitowoc crane's operation for specialized applications, with or without attachments. EPIC is a key reason no other crane can match the performance and reliability of Manitowoc.

## Hydraulics

Our closed-loop system provides a separate hydraulic circuit to power each crane function. The result is truly independent, variable-speed operation of the swing, load hoist, boom hoist and travel functions.

## Crawler drive shafts

These eliminate the need to disconnect hydraulic systems for shipment—simplifying crawler removal and assembly.

## FACT™ connectors

Manitowoc's Fast Aligning Connection Technology (FACT) precisely aligns crane components for safe, fast, easy assembly.

# Specifications

## Upperworks

### Engine

Cummins Model QSL 8.9 liter diesel, 6 cylinder, 253 kW (340 BHP) @ 1800 governed RPM.

Includes engine block heater (120 V), air heater starting aid (24 V), oil heater starting aid (120 V), high silencing muffler, radiator and fan.

Multiple hydraulic pump drive transmission provides independent power for all machine functions.

Two 12 volt maintenance-free, Group 8D batteries, 1375 CCA at -18°C (0° F), 24 volt starting and 70 amp alternator.

One 568 l (150 gal) capacity diesel fuel tank, mounted on right side of upperworks, with level indicator in operator's cab.

### Controls

Modulating electronic-over-hydraulic controls provide infinite speed response directly proportional to control lever movement. Controls include Manitowoc's exclusive EPIC® Electronically Processed Independent Control system with CAN-BUS technology providing microprocessor driven control logic, pump control, on-board diagnostics, and service information.

Block-up limit control is standard for hoist and whip lines.

Rated Capacity Indicator system (RCI) is standard for main boom and upper boom point. "Function cut-out" or "warning only" operation is available via programmable configuration.

Travel and swing alarms are standard.

### Hydraulic system

Six high-pressure piston pumps are driven through a multi-hydraulic pump transmission. These six pumps provide independent "closed loop" hydraulic power for front drum, rear drum, boom hoist system, swing system, and both left and right crawler operation.

Hydraulic reservoir capacity is 300 l (79.25 gal) and is equipped with breather, sight and electrical level indicator, clean out access, and internal diffuser.

Each function is equipped with relief valves to protect the hydraulic circuit from overload or shock.

Replaceable, ten micron (absolute) full flow tank filter is furnished in the hydraulic circuit. All oil is filtered prior to return to the hydraulic reservoir.

Hydraulic system also includes pump transmission disconnect clutch & hydraulic oil cooler.

## Drums

Two equal width winches are driven by independent variable displacement axial piston hydraulic motors through planetary reduction mounted on separate front and rear shafts with anti-friction bearings. Drums are grooved for 26 mm rope.

Powered hoisting/lowering operation is standard with automatic (spring applied, hydraulically released) multi-disc brakes, and drum rotation indicators.

- Optional: free-fall operation for front and/or rear drums(s).
- Optional: auxiliary (third) hydraulic powered drum mounted in boom butt. Includes third drum control system. Auxiliary drum is used as the luffing hoist when machine is equipped with a luffing jib.
- Optional: auxiliary drum preparation includes electric wiring, controls, hydraulic selector valve and plumbing.

## Boom hoist

Independent boom hoist consists of drum grooved for 22 mm diameter wire rope. Includes 22 mm diameter wire rope for 20 part line reeving.

Drum is powered by a variable displacement hydraulic motor coupled to an internal brake and planetary gearbox equipped with ratchet and pawl.

## Mast and gantry

Moving mast is 8,2 m (27 ft) long and connects the boom hoist reeving to the steel boom suspension strap rigging. When used with optional self-erect package, the mast is utilized for crane assembly and disassembly. It is capable of lifting and positioning the crawler assemblies, stacking the counterweights and assembling the boom and jib.

# Specifications

Gantry includes gantry raising cylinders capable of lifting the entire upperworks counterweight for removal and installation. Back hitch telescopes from storage to working position and is locked with power-actuated pins. Counterweight is suspended from gantry with straps.

Spring cushioned boom stop and automatic boom stop standard.

## Counterweight

Qty.	Item	Unit weight		Total weight	
		kg	lb	kg	lb
1	Upperworks Tray	9 965	22,092	9 965	22,092
6	Upper Side Box	7 938	17,500	47 628	105,000
Series 1 Total		57 593	127,092		
1	Upperworks Center Box	2 680	5,908	2 680	5,908
2	Upper Side Box	7 938	17,500	15 876	35,000
2	Carbody Lower Box	12 020	26,500	24 040	53,000
Optional: add to Series 1 for Series 2 Total		100 189	221,000		

Series 1 and Series 2 counterweight configurations. Includes connecting pins, brackets, and stops.

## Swing system

High strength fabricated steel alloy rotating bed is mounted on 2,76 m (108-9/16") diameter turntable single-row ball bearing.

Independent swing powered by a fixed displacement hydraulic motor coupled to a planetary gearbox with internal brake.

Swing system maximum speed: 2.3 rpm.

## Operator's cab

Fully enclosed and insulated galvannealed steel module is equipped with sliding door, large safety glass windows on all sides and roof. Signal horn, cab space heater, front and roof windshield wipers, air conditioning, dome light, sun visor and shade, fire extinguisher and air circulating fan are standard.

 Optional: tilt cab.

 Optional: nylon protective window covers.

## Lowerworks

### Carbody

Connects rotating bed to crawler assemblies. High strength fabricated steel assembly with FACT™ connection system for safe fast installation and removal of crawler assemblies.

### Crawlers

Crawler assemblies are 8,3 m (27' 2") long with 1,22 m (48") wide cast steel crawler pads. Each crawler is identical and can be mounted on either side of the carbody. Each crawler is powered independently by a variable displacement hydraulic motor and includes two hydraulically powered pin actuators for fast installation and removal from carbody. Carbody mounted drive motors are connected to crawler final reduction via telescoping shafts. This permits crawlers to be removed without opening their hydraulic circuits. Crawlers provide ample tractive effort that allows counter rotation with full rated load. Maximum ground speed of 1,8 kph (1.1 mph).

 Optional: self-erect system includes: carbody jacking cylinders with pads, controls, 27,2 t (30 USt) assembly block, boom-buttt installation support, gantry cylinders and crawler handling chain.

## Attachments

### No. 76 heavy-lift main boom

The liftcrane is equipped with a 20 m (65.6') No. 76 basic heavy-lift tubular chord boom consisting of a 5,5 m (18') butt, 5,5 m (18') insert, and 9 m (30') top with seven 76,2 cm (30") diameter roller bearing sheaves in 3 sheave packs. Includes rope guides, boom hoist wire rope, and boom angle indicator. The No. 76 boom utilizes steel suspension straps and Manitowoc's exclusive FACT™ connection system.

Powered boom hinge system including cylinder, piping, operating controls and locking device standard.

Luffing jib preparation included as standard.

 Optional: 3,0 m (10'), 6 m (19'), and 12 m (39') No. 76 boom inserts with steel boom suspension straps, and FACT™ connection system.

# Specifications

## No. 134 fixed jib

- Optional: No. 134 basic tubular chord fixed jib 9,1 m (30') in length consisting of 4,6 m (15') jib butt and 4,6 m (15') jib top with 3,7 m (12') jib strut, pendants and backstay. Includes RCI hardware. For use with boom No. 76.
- Optional: No. 134 fixed jib inserts 3,0 m (10') and 6,1 m (20') with pendants.

Utilize fixed jib inserts in combination with the No. 134 basic fixed jib for total lengths up to 24,4 m (80').

## No. 135 luffing jib

- Optional: 21,3 m (70') basic No. 135 tubular chord luffing jib assembly with RCI hardware consisting of 8,2 m (27') butt, 6,1 m (20') insert, and 7,0 m (23') top with two 68,6 cm (27") straight roller bearing sheaves and pin connected jib sections, pendants, fixed strut, jib strut, backstay pendants, boom point wheel, 26 mm luffing jib hoist line. For use with No. 76 boom.
- Optional: 3,0 m (10'), 6,1 m (20'), and 12,2 m (40') No. 135 inserts with pendants. Utilize luffing jib inserts in combination with the No. 135 basic luffing jib for total lengths up to 57,8 m (170').

## Optional equipment

- Blocks and hooks –

13,6 t (15 USt) swivel hook and weight ball.

27,2 t (30 USt) hook block with one 76,2 cm (30") sheave for 26 mm wire rope with swivel hook, hook latch and swivel lock (assembly block).

54 t (60 USt) hook block with two 76,2 cm (30") sheaves for 26 mm wire rope with swivel hook, hook latch and swivel lock.

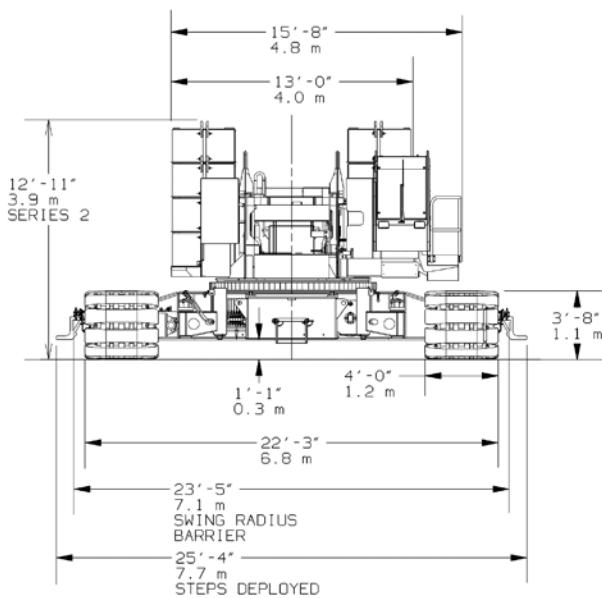

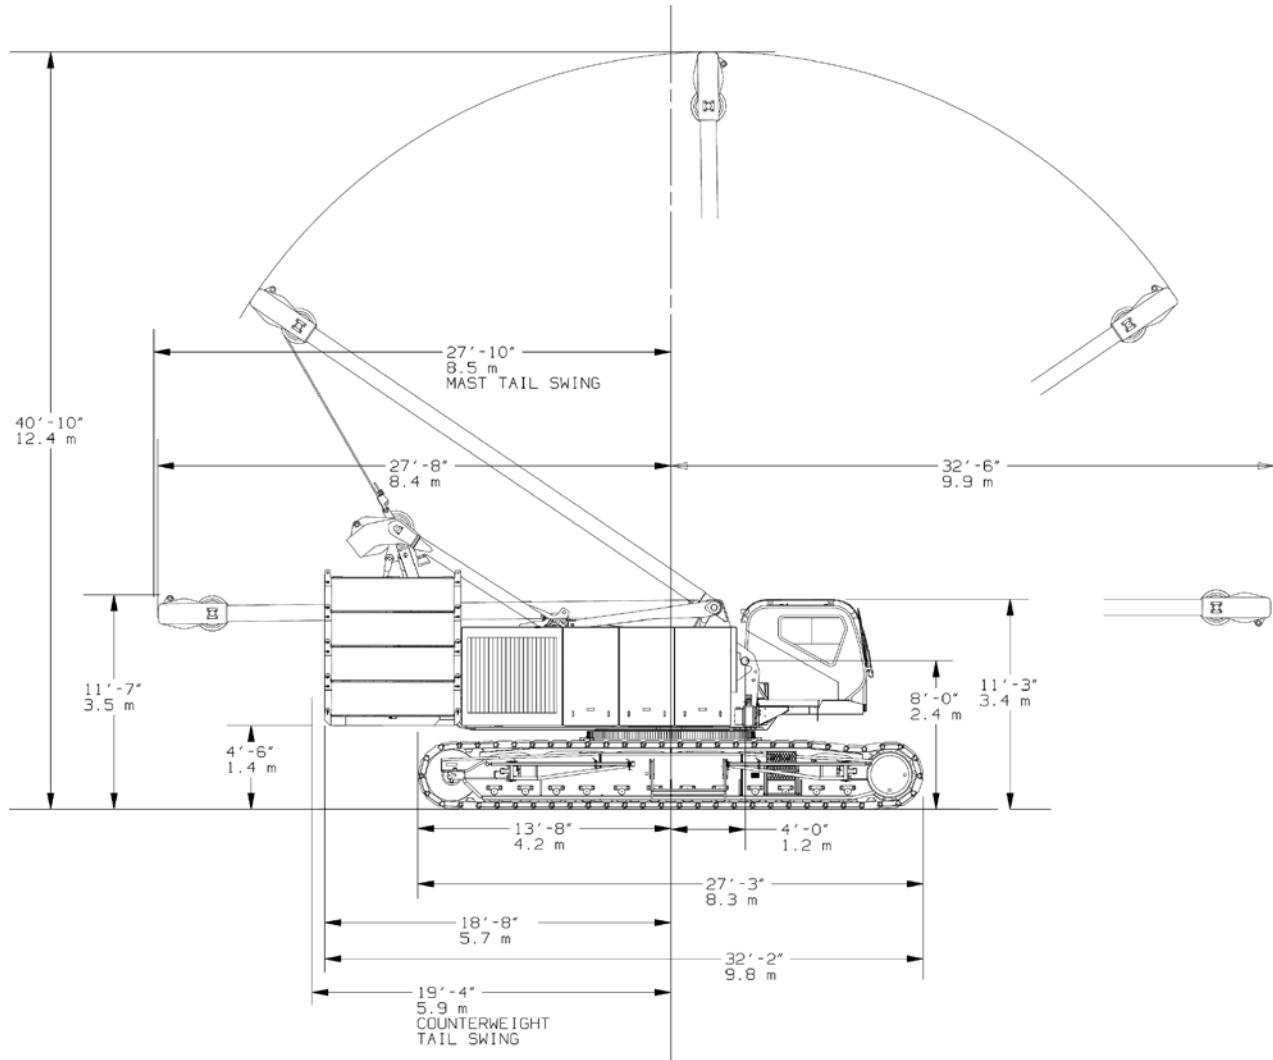

91 t (100 USt) hook block with three 76,2 cm (30") sheaves for 26 mm wire rope with duplex swivel hook, hook latch, and swivel lock.

150 t (165 USt) hook block with six 76,2 cm (30") sheaves for 26 mm wire rope with duplex swivel hook, hook latch, and swivel lock.

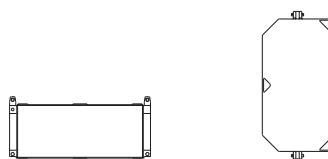

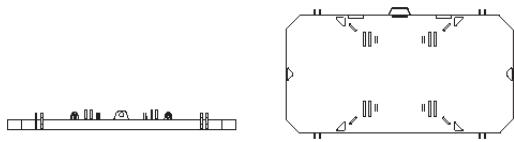

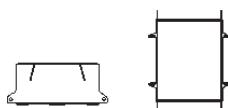

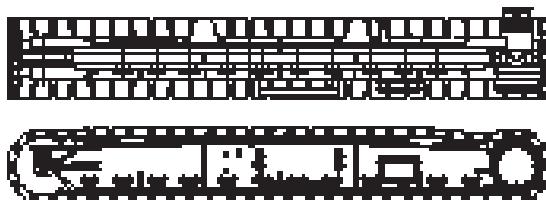

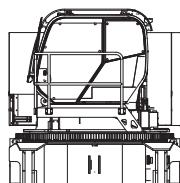

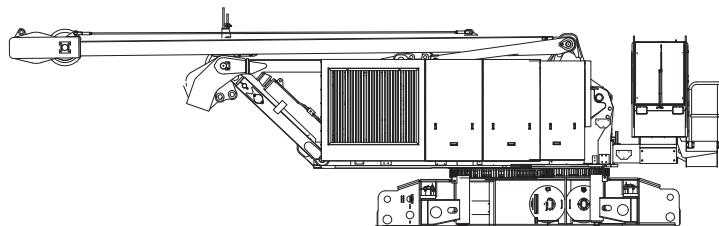

200 t (220 USt) hook block with seven 76,2 cm (30") sheaves for 26 mm wire rope with swivel hook, hook latch, and swivel lock.

- Hydraulic Test Kit.
- Service Interval Kits.
- Special Paint Color (other than Manitowoc standard red and black.)
- Special Customer Decals: custom vinyl decal(s) of name and/or logo from artwork supplied by customer.
- Export Packaging: basic crane, boom and jib sections.

83 (272)	186	(610)	274	(900)	450	(1475)	3	
89 (292)	198	(650)	293	(960)	450	(1475)	3	
95 (312)	210	(690)	311	(1020)	—	—	—	
98 (322)	216	(710)	—	—	—	—	—	

NOTE: Hoist and whip line lengths given in table will allow hook to touch ground. When block travel below ground is required, add additional rope equal to parts of line times added travel distance. Hoisting distance or line pull may be limited when block travel below ground is required.

Maximum wire rope length allowed on Drum 3 (Auxiliary Drum) is 235 m (770 ft).

## Hoist reeving for main load block - 26 mm - No. 76 main boom

No. Parts of Line	Maximum Load	
	kg	(lb)
1	14 290	31,500

92 (302)	204	(670)	302	(990)	—	—	—
95 (312)	210	(690)	311	(1020)	—	—	—
98 (322)	216	(710)	—	—	—	—	—

NOTE: Hoist and whip line lengths given in table will allow hook to touch ground. When block travel below ground is required, add additional rope equal to parts of line times added travel distance. Hoisting distance or line pull may be limited when block travel below ground is required.

Maximum wire rope length allowed on Drum 3 (Auxiliary Drum) is 235 m (770 ft).

# Performance data

## Wire rope lengths Luffing jib No. 135 on Boom No. 76

Boom length*	Luffing jib hoist line		
	Hoist line drum 2	Maximum required parts of line	
m (ft)	m (ft)		
20 (66)	244 (800)	4	
23 (76)	259 (850)	4	
26 (85)	274 (900)	4	
29 (95)	290 (950)	4	
32 (105)	305 (1000)	4	
35 (115)	320 (1050)	4	
38 (125)	320 (1050)	3	
41 (135)	335 (1100)	3	
44 (144)	351 (1150)	3	
47 (154)	351 (1150)	3	
50 (164)	351 (1150)	3	
53 (174)	366 (1200)	3	
56 (184)	366 (1200)	3	
59 (194)	366 (1200)	3	

\*Hoist line lengths given in table include all luffing jib lengths.

NOTE: Hoist line lengths given in table will allow hook to touch ground. When block travel below ground is required, add additional rope equal to parts of line times added travel distance. Hoisting distance or line pull may be limited when block travel below ground is required.

## Drum capacities - wire rope

	Maximum length No lagging
Front or rear grooved drum 26 mm wire rope*	399 m (1,310 ft) 6 layers
Auxiliary drum (1") wire rope **	208 m (684 ft) 8 layers
Boom hoist drum 22,23 mm (7/8") wire rope	323 m (1,060 ft) 6 layers

\*5,5 m (18 ft) is deducted from maximum spooling capacities for 3 dead wraps per drum on drums 1 and 2.

\*\*6,1 m (20 ft) is deducted from maximum spooling capacity for 3 dead wraps on drum 3.

## Wire rope specifications 5:1 Safety Factor Boom No. 76

# Manitowoc Crane Care

Manitowoc Crane Care is the industry's most advanced service and support program, designed to keep your cranes up and running. Manitowoc's distributor network and customer support personnel are available to support you 24 hours a day, 7 days a week, 365 days a year. There are five key disciplines of Manitowoc Crane Care:

## **Parts**

Genuine Manitowoc replacement parts are accessible through your distributor.

## **Service and technical support**

Assistance with crane selection, lift planning and ground bearing calculations or field service and maintenance.

## **Technical publications**

Operator, parts, service and capacity chart manuals are available in multiple formats in major languages.

## **Training**

A variety of training courses are available online or through Manitowoc training centers.

## **EnCORE**

Rebuild, repair, remanufacture or exchange your current crane through our local network, for a fraction of the cost of a new crane.

**[www.manitowoccranecare.com](http://www.manitowoccranecare.com)**

CraneSTAR is an exclusive and innovative crane asset management system that helps improve your profitability and reduce costs by remotely monitoring critical crane data. Visit [www.cranestar.com](http://www.cranestar.com) for more information.
