

Lubricants analysis kit

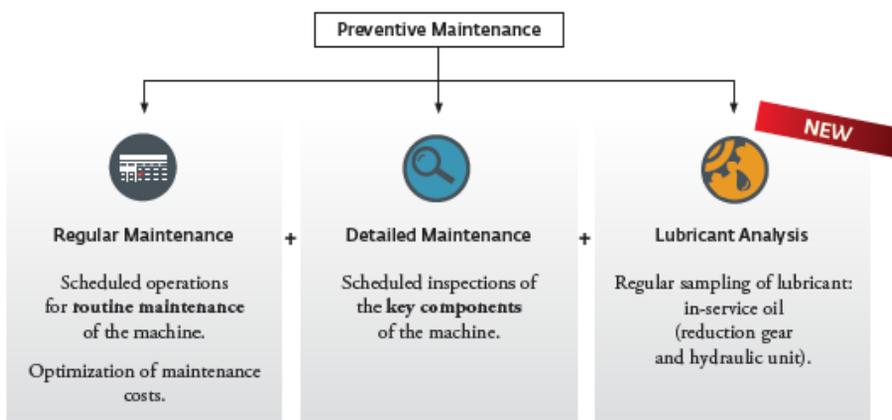

Optimize your maintenance costs

Maintenance,
keeping your crane in optimal working order:

Regular maintenance of your cranes prolongs **their reliability and service life**. Its purpose is not solely to make repairs (corrective maintenance) but also to **anticipate and prevent malfunctions or broken parts (preventive maintenance)**. Scheduling preventive maintenance programs means productivity can be maintained; it helps to keep costs down.

Manitowoc is pleased to announce the offering of a **new lubricant analysis kit** that is easy to incorporate into your current preventive maintenance programs. This kit can be ordered as a spare part from Potain Support.

Preventive maintenance, a Potain recommendation:

Analysis kit:

Oil: 84052659 (reduction gears and hydraulic units),

Grease: 84052660 (slewing rings and reduction gears).
