# National N-150 Articulating Crane

From America's Truck-Mounted Hydraulic Crane Leader

NATIONAL CRANE A Grove Worldwide Company

- Crane Rating: 155,550 ft•lb (21.51 t•m) with the N-150/25 boom
- Maximum Capacity: 8.75 ton (7.9 t)
- Maximum Vertical Reach:\* 64 ft 2 in (19.56 m)
- Horizontal Reach: 54 ft (16.46 m)
- Reach Below Truck Frame:\* 46 ft 10 in (14.27 m)
- Total Hydraulic Extension: 46 ft (14.02 m)
- \* Maximum vertical reach is from ground level, with an N-150/46-54 crane mounted on a 42-in (1067-mm) bigh truck frame

#### The National Advantage

When you invest in a National articulating crane, you are assured of these competitive advantages:

#### Quality

National cranes are designed for durability, performance, and ease of service. National's cutting-edge technologies set the industry standard for the manufacture of lifting and materials handling equipment. An experienced workforce turns innovative designs into qualitycrafted cranes. Factory prototypes are subjected to some of the toughest testing requirements in the industry. Each National crane is checked throughout the manufacturing and assembly process, then given a detailed final inspection before it is released from the factory.

#### Performance

Each user-friendly National gives you what you expect in a crane. Long reach. High capacity. Fast set-up. Easy operation. Smooth movement. Versatile accessories. Premium components. Add it all up—you'll find that a National is not only a pleasure to operate, but a reliable investment in bottom line performance.

#### Value

National has manufactured cranes since 1963. With a National you get field-proven reliability plus the best factory/dealer support in the industry. National's warranty provides protection against defects in materials and workmanship for a full year from the date the customer takes delivery. Dealers maintain extensive parts stocking programs. Should a dealer be unable to supply a part you need, National's back-up program is committed to providing equipment replacement parts on a breakdown rush basis, holding your downtime to a minimum. These advantages enhance a National crane's resale value-consistently the highest in the industry!

National Crane is ISO 9001 certified

- 155,550-ft•lb (21.51-t•m) crane rating with the N-150/25 boom 8.75-ton (7.9-t)
- maximum lifting capacity 64-ft 2-in (19.56-m)
- maximum vertical reach\* 54-ft (16.46-m) horizontal reach

46-ft 10-in (14.27-m) reach below truck frame\* 46-ft (14.02-m) total hydraulic extension

\* From ground level with an N-150/46-54 crane mounted on a 42-in (1067 mm) high truck frame

#### Strong booms and jibs

- Five-section proportional outer boom extends each section in equivalent lengths during the telescoping process
- Proportional boom design enhances boom weight distribution, maximizes operational efficiency, and allows higher capacities, particularly in normal working radii
- Ultra-strong boom sections manufactured from low-alloy, high-strength steel
- Four-bar link facilitates close load placement to crane mast
- Long-wearing *Easy Glide* wear pads enhance smooth boom performance

#### **Durable cylinders**

- Cylinder shafts are hard chromeplated and high pressure tubing is used wherever possible to reduce hose wear
- All cylinders are double acting for smooth, positive control

#### Clean design

• Wherever possible, heavy-duty wirebraided hoses are routed inside the mast and boom for protection from bumps, twists, cuts, abrasions and snagging, and to enhance the crane's appearance

#### Boom tip and hardware

• The boom tip or jib is equipped with a swivel hook and safety latch (rated for maximum crane capacity); it is designed to accept all boom tip options by a simple pinon procedure

#### Counterbalance valves

• Integrally mounted, pilot-operated counterbalance valves on lift, fold and extend cylinders lock all cylinders in place in the event of hose failure or until they are powered to move—they help prevent inadvertant cylinder movement

#### Capacity alert

 Standard capacity alert system with load range gage helps prevent crane operation beyond the crane capacity; alert system blocks all functions in event of overload condition

#### Efficient rotation

- Low maintenance shear ball bearing rotation system with smooth, precise planetary control
- When not powered, the swing is locked in place by a spring-applied, hydraulically released brake
- Powered by a high-torque, lowspeed motor through a double reduction planetary gearbox

#### High performance hydraulics

- Couplings and fittings are of highest quality; hydraulic hoses, tubes and fittings have a 4:1 minimum safety factor on burst
- A high-capacity, high-pressure, vane pump produces full system pressure—even at truck engine idle speed—and maintains high efficiency throughout its life
- A two-bolt pump mounting flange can be integrally mounted to most PTO's to simplify mounting
- O-ring face seal fittings help eliminate leakage

• Detachable oil tank (for easy maintenance) comes with an oil level sight gage, breather, magnetic plug and 10-micron external return line filter integrally mounted to the crane frame; special design reduces mounting time and space requirements

#### Chrome-plated pins

• Large-diameter chrome-plated pins with encapsulated composite bearings provide long life with reduced maintenance

#### User-friendly operation

- Identical crane function controls on both sides of crane—same controls, same hand positioning
- Operator can work controls from either station, keeping boom and load in full view at all times
- Boom can be worked and rotated simultaneously
- Extra-fine metering and low spool forces for smooth, precise fingertip control
- Control knobs are illustrated with function symbols
- Additional valve banks for operating hydraulic accessories can easily be added

#### Solid Stability

- 20-ft (6.10-m) hydraulic outriggers provide solid stability—even when the crane is set up on uneven ground; 16-ft (4.88-m) outriggers are available, based on suitable truck chassis
- 28.13-in (715-mm) stroke hydraulicpowered outrigger legs set up quickly and easily from either side of the crane, provide ample penetration
- Standard outrigger pads are 10x14 in (254x355 mm)
- Enclosed outrigger cylinders with pilot-operated check valves
- Legs are removable for shipment and storage

#### Simplified Mounting

- Easy three-point clamp-on mounting minimizes crane and truckframe stress
- May be mounted on standard, single-axle trucks

A wide choice of accessories (see page 8)

#### **Technical Data**

Maximum working pressure	3,950 psi	. 272 bar
Pump capacity (vane-type pump)	15 gal/min	. 57 L/min
Reservoir oil capacity		
Outrigger span*	20 ft	6.10 m
Outrigger vertical travel		
Stowed height (above truck frame w/o T-box)	8 ft 3 in	. 2.51 m
Basic Model N-150/25 weight**	6,625 lbs	. 3005 kg
Filter	10 micron replaceable (spin-on type)	5
Rotation (non-continuous)	390 degree	. 390 degree
Mounting space required	47 in	. 1194 mm
with optional winch	52.5 in	. 1334 mm
Boom rotation speed***	360° in 26 sec	
Boom hydraulic extension speed***		
Boom hydraulic retraction speed***		

Note: Contact the factory for continuous duty cycle applications \* 16-ft outriggers are available, based on suitable truck chassis \*\*Basic model—crane options and longer boom lengths will increase weight \*\*\*Approximate

#### Caution

- Do not operate crane booms, jib extensions, any accessories or loads within 10 ft (3 m) of live power lines or other conductors of electricity
- All capacities shown are maximum allowable loads, including the weight of any attached accessories
- Do not exceed jib capacities at reduced radii

### **National N-150 Crane Specifications**

#### The Basic N-150

- 155,550-ft•lb (21.51-t•m) crane rating
- 8.75-ton (7.9-t) maximum lifting capacity
- Two hydraulic out-and-down outriggers extending to 20 feet (6.10 m)
- 390-degree rotation
- Five function control valves
- Integrally mounted counterbalance valves on lift, fold, and extend; pilot-operated check valves on outriggers
- High-capacity four-bar linkage at fold joint
- Dual controls
- Manual cabled engine speed control
- Hydraulic Capacity Alert (HCA) system with load range gage
- · Hydraulic reservoir
- Hydraulic pump and easy mounting group
- Crane hook with safety latch

#### Model 46/54

- 139,400-ft•lb (19.27-t•m) crane rating
- 8.75-ton (7.9-t) maximum lifting capacity
- Mast, inner boom, outer boom, four hydraulic and one manual extension reaching to 54 ft (16.46 m)
- 46-ft 10-in (14.27-m) reach below truck frame
- 64-ft 2-in (19.56-m) maximum vertical reach when mounted on a 42-in (1067-mm) high truck frame

#### Other Models available:

**150/25.....** 2-section boom to 25' **150/32.....** 3-section boom to 32' **150/39......** 4-section boom to 39' **150/46......** 5 section boom to 46'

#### Notes:

These notes pertain to mounting specification data on preceding page

- Truck used for mounting must meet these minimum requirements for capacity loads
- Always specify Gross Axle Weight Rating (GAWR) when purchasing trucks
- Rotate loads slowly and smoothly for maximum control
- Use caution when rotating boom from areas supported by outriggers to areas supported by springs—vehicle level changes as springs compress
- Under-minimum front or rear axle chassis weights may require counterweight to keep unit stable
- Diesel engines, longer wheelbase or service bodies may increase minimum axle requirements—contact factory for information
- Diesel engines require variable speed governor
- Chassis weight may include bed, PTO, pump, rear bumper, or any other permanently attached items (other than the crane itself)

MINIMUM WORKING RADIUS

Rotation: 390 degree (non-continuous)

Maximum Load Moment: 191,105 ft•lb (26.01 t•m)

Maximum Thrust Load: 29,000 lbs (12.95 t•m) at mounting surface

> Maximum Rotational Moment: 16,705 ft•lb (2.27 t•m)

T-Box Height (if required) = 6.62 in (168 mm)

**National N-150 Accessories** 

Every National is part of a complete and versatile lifting system that lets you do more faster. You can tailor your crane to perform jobs that would otherwise call for a whole fleet of specialized equipment.

Information on specific accessories is available. Contact your National Crane dealer to learn more about these costefficient accessories.

Note: Weights of all accessories attached to the boom or loadline of the crane must be deducted from the effective lifting capacity. Additional accessories not listed may be available. Not all accessories are available for all crane series, and some accessories cannot be used in combination with other accessories. Consult your dealer or the factory for specific accessory capabilities, availability and pricing.

<b>Remote Controls</b> One-hand control. Precise control. Total load vi- sibility. Diesel engines require electric shut-off.	<ul> <li>Model MR4</li> <li>Model MR5 (requires AH1)</li> <li>Model MR6 (requires AH2)</li> </ul>
<b>Radio Remote Controls</b> Eliminate handling and maintenance concerns that accompany cabled remotes. Operate to a range of approximately 400 ft (121.92 m), varying with conditions.	<ul> <li>Model MR4R</li> <li>Model MR5R (requires AH1)</li> <li>Model MR6R (requires AH2)</li> </ul>
<b>One-Person Basket</b> Fiberglass with 300-lb (136 kg) capacity. Gra- vity hung. Dual baskets available.	• <i>Model BL1</i> (with swing lock, body harness and lanyard)
<b>Hydraulic Auger</b> Digging depths to 4 ft 6 in (1.4 m) and flight- ings to 18 in (457 mm).	<ul> <li><i>Model AG</i> (Requires AH1)</li> <li><i>Model AGHP</i> (high-speed)</li> </ul>
<b>Winch</b> Heavy-duty, easy single pin attachment of boom-tip sheave head. Includes winch control and anti-two-block system.	• Model N16
Front Stabilizer Center-mount single front with a 25-in vertical stroke. Tilts forward for chassis with tilt hood. SFOH includes control valve.	<ul> <li><i>Model SFOH</i> (hydraulic)</li> <li><i>Model SFOM</i> (manual)</li> </ul>
<b>Pallet Fork</b> A fork with 4,400-lb (1996 kg) capacity, plus adjustable throat and teeth.	<ul> <li><i>Model MKF</i> (manual leveling adjustable throat)</li> <li><i>Model HKF</i> (hydraulic leveling adjustable throat, requires AH1)</li> <li><i>Model HKFR</i> (hydraulic leveling adjustable throat with hydraulic rotator, requires AH2)</li> </ul>
<b>Grapple</b> Grapples are available in butt or bypass type. Both come with a hydraulic rotator and quick connect fittings.	<ul> <li><i>Model BTG</i> (requires AH2)</li> <li><i>Model BPG</i> (requires AH2)</li> </ul>
<b>Clam Bucket</b> The clam bucket can be used to load or move materials in 1/3 yd <sup>3</sup> (.25 m <sup>3</sup> ) bites.	• <i>Model GPC</i> (requires AH2)
Accessory Control Valves Allow operation of hydraulic accessories, mount easily on the control panel. RAH1 and RAH2 are same as AH1 and AH2 but provide boom hose take-up reel in lieu of piping.	<ul> <li><i>Model AH1</i> (single function for rotator or auger)</li> <li><i>Model AH2</i> (two functions for grapple or clam)</li> </ul>
Continuous Rotation	• Model CR
