

WIRELESS HYDRAULIC PRESSURE TEST KIT

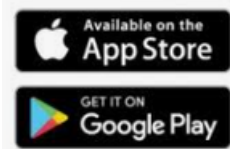

Increase service efficiency with quick and easy measuring and recording of hydraulic pressures on all systems without the need for hydraulic hoses.

■ Wireless Hydraulic Pressure Test Kit

- Seamlessly measures hydraulic pressure on all crane systems without cumbersome hoses.
- Communicates wireless via Bluetooth with the Manitowoc smartphone app.
- Kit (part number 90046023) includes:
 - Two transducers with Stauff pressure test connectors
 - Two transducers fitted with Parker quick disconnect connectors.
 - #4 and #6 SAE J1453 ORFS adapter
- Rugged carry case for easy storage on service trucks.

Bluetooth certified pressure transducer uses a patented design to connect tablets and smartphones through the free, downloadable “Manitowoc Pressure Transducers” app for iOS and Android devices.

Manitowoc Pressure Transducers App

- Pressure readings sent via Bluetooth to smartphone or tablet.
- Pressure ranges from Vacuum to 10,000 PSI.
- Datalogging capable.
- Free download for iOS (App Store) or Android (Google Play) devices.
